

# M75 Fabric vs Space Boarding and Yorkshire Boarding

Effective ventilation is critical for maximising the health and performance of housed livestock. Galebreaker have tested their standard M75 mesh against traditional cladding rivals and focused on draught reduction, ventilation, light transmission, rain penetration and cost.

Standard M75 Galebreaker mesh offers outstanding value for money, either outperforming or matching its old wooden and metal rivals. Knowing you can choose rolling or removeable solutions, as well as different types of mesh to suit your requirements, Galebreaker wins hands down!
